Budget 2024 Expectations Live Updates: What is on Sitharaman's cart for eCommerce industry?

Budget 2024 Expectations Live Updates: "The eCommerce industry in India has changed the business landscape, increasing consumption by providing direct access to end-consumers and creating fresh job opportunities. In anticipation of the upcoming Union Budget, we look forward to measures that can strengthen ongoing efforts towards improving last-mile connectivity in the logistics sector. For D2C brands and small sellers driving the Indian economy, this is non-negotiable, as they will be key growth drivers for our economy. The government's steadfast backing through technology adoption, digitisation, innovative digital payment methods and local logistics infrastructure development has played a major role in boosting the logistics industry. It is anticipated that the new budget will continue these initiatives while ensuring the smooth integration of local and global value chains. By doing so, these are the aspects that will keep us going, help SMEs grow and contribute to the nation's overall economic development," said Vineet Agarwal, MD - TCI.

Budget must focus on infrastructure for logistics, says TCI

"The cold chain business is very exciting. I think in the next few years, we are going to see a dramatic shift of consumer trends towards more and more processed foods, as well as the fact that there are QSRs that are growing," Vineet Agarwal, Managing Director of Transport Corporation of India said.
