EDITORIAL

“Har safar sirf manzil tak pahunchne ka naam nahi... balki har ghar tak zindagi ko surakshit lautane ka vaada hai.”

Dear Readers,

India is moving faster than ever. Highways stretch farther, logistics networks grow stronger, and millions of journeys begin every single day. But behind every journey is a life, a family, a story waiting to return home.

Road safety is no longer just a regulation, it is an emotion, a responsibility, and a collective promise.

In this edition, we bring you stories, insights, and global inspirations that remind us of one simple truth: every accident is preventable, and every life is invaluable.

Across the world, countries like Sweden, Norway, and the Netherlands have shown us that safer roads are not achieved overnight, they are built through awareness, discipline, and human-centric thinking. Their success lies in a powerful belief: no life should be lost on the road.

Inspired by these global benchmarks, Transport Corporation of India Limited (TCI) has taken a meaningful step forward with TCI Safe Safar—an initiative that goes beyond awareness to create real behavioural change across highways, drivers, and communities.

This edition features the pioneering efforts of Transport Corporation of India Limited (TCI) through its flagship initiative, TCI Safe Safar. More than just a road safety program, TCI Safe Safar embodies a holistic vision—one that blends driver education, health and well-being, community awareness, and technology-driven interventions to create safer highways across the nation. From interactive workshops and mobile outreach to culturally engaging street plays and health camps, the initiative demonstrates how corporate responsibility and operational excellence can converge to make a tangible difference.

From highways to heartways, from compliance to compassion, this edition explores how safety can become a culture.

“Sadak par zimmedari, zindagi ki sabse badi suraksha hai.”

This publication is a part of KNIT, a knowledge dissemination initiative of TCI Group. We believe in sharing insights and knowledge with the industry, to encourage best practice replication.

Safar Surakshit, Zindagi Surakshit

Cover Story

Road Safety: A Collective Responsibility

“Raaste sabke hain... zimmedari bhi sabki hai.”

Every time a vehicle starts, a life is set in motion.

Roads are the lifelines of modern economies. They connect cities, power industries, and enable dreams. But they also carry a silent risk.

Globally, over **1.19 million lives are lost every year** due to road accidents. In India alone, more than **1.68 lakh people lost their lives in 2022**. These are not just numbers, they are unfinished stories, empty chairs at dinner tables, and dreams left behind.

The reality is stark but not irreversible.

Countries like **Sweden** have adopted the **Vision Zero** approach, where the goal is simple yet powerful: zero deaths on roads. **Norway**, with one of the lowest fatality rates globally, focuses on strict enforcement and safer road design. The **Netherlands** has reimagined roads to protect the most vulnerable—cyclists and pedestrians.

These nations prove that **accidents are not fate, they are failures of systems that can be fixed.**

India stands at a critical moment. With one of the world’s largest road networks, the opportunity is immense - not just to grow, but to grow safely.

“Tez chalna zaroori hai, par surakshit pahunchna usse bhi zyada zaroori hai.”

India's Road Reality – Speed, Scale, and the Safety Challenge

India moves on its roads—but too often, it loses lives on them.

With over **6.3 million km of roads**, India's network is among the largest in the world. But with growth comes responsibility.

- Over-speeding causes 70%+ fatalities
- Highways contribute disproportionately to deaths
- Young, earning individuals are the most affected

Behind every statistic is a deeper issue—**behavior**.

Speed thrills, but it also kills. Fatigue slows reflexes. Distractions divide attention. And a moment's mistake can change everything.

"Ek pal ki laparwahi, poori zindagi par bhaari pad sakti hai."

Why Accidents Happen: Understanding the Real Causes

“Accidents are not destiny—they are decisions, delays, and distractions.”

“Sadak par hone wala har accident ek kahani hoti hai—aur har kahani ka ek kaaran hota hai.”

When we hear about road accidents, we often call them “unfortunate incidents.” But the truth is, **most accidents are preventable**. They are rarely random. They happen because of small choices, overlooked risks, and systemic gaps.

To truly reduce accidents, we must first understand why they happen.

- 1. Over-speeding – The Biggest Killer:** Speed gives a false sense of control. The faster we go, the less time we have to react and the more severe the impact becomes.

In India, over-speeding contributes to **over 70% of road fatalities**. On highways, where roads are smoother and vehicles faster, this risk multiplies.

Global Insight: Countries like Sweden and Norway strictly enforce speed limits not just through fines, but through road design – speed calming zones, rumble strips, and automated monitoring.

Reality Check: A difference of just 10 km/h can decide whether a crash is survivable or fatal.

“Raftaar se nahi, samajh se gaadi chalaayein.”

2. Driver Fatigue – The Silent Risk

Fatigue doesn't announce itself – it creeps in quietly.

Long-haul drivers, often drive for extended hours. Reduced sleep leads to:

- Slower reaction time
- Micro-sleeps (seconds of unconsciousness)
- Poor decision-making

A fatigued driver can be as dangerous as a drunk driver.

Global Insight: In Japan and the United Kingdom, strict regulations ensure:

- Mandatory rest breaks
- Driving hour limits
- Digital monitoring of driver schedules

What India Needs: A cultural shift where rest is not seen as weakness, but responsibility.

“Thakaan ko nazarandaaz karna,
khatre ko dawat dena hai.”

"Phone ruk sakta hai...
zindagi nahi."

3. Distracted Driving – A Growing Threat

In today's connected world, distraction is everywhere. Checking a message, taking a call, or even adjusting navigation can take your eyes off the road for a few seconds but at highway speeds, those seconds can be deadly.

Fact: Drivers using mobile phones are 4 times more likely to crash.

Global Insight: Countries like United Kingdom run strong public campaigns like "THINK!" that emotionally highlight the consequences of distracted driving.

Reality: It's not just about phones – distractions include:

- Eating while driving
- Talking to passengers
- Mental stress

*“Sadak sirf raasta nahi...
zimedari bhi hai.”*

4. Poor Road Infrastructure – When Roads Fail People

Sometimes, the road itself is unsafe.

Common issues:

- Poor lighting
- Lack of signage
- Dangerous intersections
- No pedestrian crossings

Global Insight: The Netherlands redesigned roads with a simple principle: “Human error should not lead to death.”

They introduced:

- Dedicated lanes
- Traffic calming zones
- Safe crossings

Key Learning: Safer roads are not wider—they are smarter.

5. Vehicle Condition – A Mechanical Risk: A well-trained driver cannot compensate for a poorly maintained vehicle.

Common issues:

- Brake failure
- Worn-out tyres
- Faulty lights

Global Insight: Countries like Japan enforce strict periodic inspections.

Key Learning: Preventive maintenance is not a cost, it's a life-saving investment.

"Gaadi ki dekhbhaal, apni suraksha ka khayal."

6. Lack of Awareness – The Root Cause

Many road users simply don't know the risks.

- Not wearing helmets
- Ignoring seatbelts
- Unsafe pedestrian behavior

Global Insight: Countries with the safest roads start education early—in schools.

This is where initiatives like TCI Safe Safar Junior become powerful.

“Jab jaankari badhegi, tabhi suraksha badegi.”

Global Best Practices

“Duniya ne raaste badle... isliye unki kahaniyan badal gayin.”

“Sabse surakshit desh bhi kabhi hum jaise hi the—farq bas soch ka hai.”

Some countries have transformed road safety so effectively that fatalities are now extremely low. Their success is not accidental – it is designed.

1. Sweden – Vision Zero

Sweden Philosophy: No loss of life is acceptable. Instead of blaming drivers, Sweden redesigned its entire system:

- Median barriers to prevent head-on collisions
- Speed limits based on road safety levels
- Pedestrian-first infrastructure

Impact: One of the lowest road fatality rates globally.

Lesson: Human life must be the starting point of all road design.

2. Norway – Discipline Meets Design

Norway combines:

- Strict enforcement
- Smart road engineering
- Strong public awareness

Unique Approach: Authorities continuously analyze accident data and fix high-risk zones immediately.

Impact: Near-zero child fatalities in some recent years.

Lesson: Consistency in enforcement saves lives.

3. Netherlands – Roads for People

The Netherlands focuses on protecting the most vulnerable:

- Cyclists
- Pedestrians
- Children

Innovations:

- Dedicated cycling highways
- Traffic calming in cities
- Clear road hierarchy

Impact: High mobility + low fatalities.

Lesson: If the weakest road user is safe, everyone is safe.

4. Japan – Culture of Discipline

Japan's success lies in:

- Strict licensing
- Strong civic discipline
- Early education

Children are taught road safety from a young age.

Lesson: Road safety is not just law—it is culture.

5. United Kingdom – Data-Driven Safety

The United Kingdom uses:

- Real-time data analysis
- Speed cameras
- Emotional awareness campaigns

Campaigns don't just inform—they move people emotionally.

Lesson: When people feel the impact, they change behavior.

Common Success Formula Across Countries

- Safer road design
- Strict enforcement
- Technology integration
- Continuous awareness
- Early education

What India Can Learn

India doesn't need to copy—it needs to **adapt**.

- Combine global best practices with local realities
- Focus on behavioral change
- Strengthen enforcement
- Invest in awareness

Programs like **TCI Safe Safar** already reflect this approach—bringing global thinking to Indian highways.

“Badlav mumkin hai... bas irade mazboot hone chahiye.”

Key Reasons:

- Over-speeding – the biggest killer
- Driver fatigue – silent and dangerous
- Distracted driving – especially mobile usage
- Poor infrastructure
- Vehicle maintenance issues
- Lack of awareness

Role of the Logistics Industry: Driving Responsibility beyond Deliveries

Logistics doesn't just move goods – it moves lives, families, and futures.

India's logistics sector is the backbone of its economy. From essential commodities to industrial goods, everything that fuels growth travels through the country's vast road network. With nearly **65% of freight moving via roads**, trucks and commercial vehicles are the most visible and constant presence on highways.

But with this scale comes a profound responsibility.

Every truck on the road represents not just cargo – but a driver, a journey, and countless interactions with other road users. This makes the logistics industry one of the **most influential stakeholders in shaping road safety outcomes in India**.

From Operations to Responsibility: Traditionally, logistics has been measured by speed, efficiency, and delivery timelines. Today, the definition is evolving.

A truly efficient supply chain is not just fast – it is **safe, responsible, and sustainable**.

Forward-looking logistics companies are recognizing that:

- Safety reduces operational risks

- Fewer accidents mean fewer delays
- Responsible practices build long-term trust

More importantly, every safe journey protects a life.

1. Driver Training – Building the First Line of Safety: Drivers are at the heart of logistics operations. Their decisions, awareness, and reflexes determine the safety of every journey. Structured driver training programs now go beyond basic driving skills to include:

- Defensive driving techniques
- Hazard perception
- Emergency response handling
- Behavioural awareness

Globally, countries like Japan emphasize rigorous driver training as a foundation of road safety.

Key Insight: A well-trained driver doesn't just react to danger – they anticipate it.

“Har trained driver, sadak par ek suraksha kavach hai.”

2. Fatigue Management – Protecting the Human behind the Wheel: Long-haul transportation often demands extended hours on the road. Tight schedules and delivery pressures can lead to driver fatigue, one of the most underestimated risks in logistics.

Responsible organizations are now implementing:

- Regulated driving hours
- Mandatory rest breaks
- Route planning to reduce strain
- Wellness and health programs

Countries like United Kingdom enforce strict fatigue management laws, recognizing that **a tired driver is a dangerous driver.**

Key Insight: Fatigue doesn't just slow drivers – it compromises judgment.

“Thoda aaram, zindagi bhar ki suraksha.”

3. Fleet Maintenance – Ensuring Machines Don’t Fail Lives: Even the most skilled driver cannot control a vehicle that is not roadworthy.

Regular and preventive maintenance is critical to:

- Avoid mechanical failures
- Ensure braking efficiency
- Maintain tyre safety
- Improve vehicle reliability

Globally, countries like Germany follow strict vehicle inspection systems to ensure safety compliance.

Key Insight: A well-maintained vehicle is not just efficient - it is life-saving.

“Gaadi ki sehat, driver ki hifazat.”

4. Technology Adoption – Smarter Systems for Safer Roads: Technology is transforming logistics from reactive to proactive safety management.

Modern fleet operators are adopting:

- GPS-based tracking systems
- Telematics for driver behaviour monitoring
- Speed alerts and geo-fencing
- AI-based fatigue detection systems

According to global studies, such technologies significantly reduce accident risks by ensuring real-time visibility and control.

Key Insight: Technology doesn’t replace drivers - it supports safer decisions.

“Smart technology, safe journeys.”

5. Awareness Programs – Creating a Culture of Safety

Beyond internal systems, logistics companies play a vital role in influencing behavioural change across the ecosystem.

Through initiatives like TCI Safe Safar, companies:

- Engage drivers directly on highways
- Educate communities along transport routes
- Promote helmet and seatbelt usage
- Use culturally relevant tools like nukkad natak

Countries like Sweden have shown that consistent awareness leads to lasting behavioural change.

Key Insight: Rules create compliance—but awareness creates commitment.

“Jab samajh badhegi, tabhi suraksha badhegi.”

**SAFETY
FIRST**

Beyond Business – A Moral Responsibility:

The logistics industry is uniquely positioned, it touches millions of lives every day, directly or indirectly.

By prioritizing safety, companies:

- Protect their drivers
- Safeguard communities
- Strengthen their brand trust
- Contribute to national road safety goals

Because at the end of the day, logistics is not just about delivering goods, it's about delivering people safely back home.

“Har delivery se pehle, har driver ki suraksha zaroori hai.”

From Responsibility to Action:

TCI Safe Safar: Turning Intent into Impact

Awareness creates intent—but action creates impact.

While the logistics industry holds the responsibility to make roads safer, real change begins when that responsibility is translated into **on-ground action**.

This is where **TCI Safe Safar** stands apart.

The Beginning of a Movement:

Launched in 2019 with a powerful vision—

“To Drivers, Through Drivers – Making India’s Roads Safer”

TCI Safe Safar was not designed as a campaign, but as a **nationwide movement**. It recognized a simple truth: The people who spend the most time on roads – drivers – must become the strongest advocates of safety.

Scale That Creates Real Impact

What started as an initiative has now grown into a **massive national outreach program**:

- **Over 13 lakh+ people reached**
- **49,000+ drivers directly engaged**
- **1.5 lakh+ safety pledges taken**
- **Coverage across 16 states and major logistics hubs**
- **1200+ on-ground engagement events**

These are not just numbers, they represent **lives influenced, behaviours changed, and risks reduced**.

Taking Safety to the Highways

Unlike traditional awareness programs, TCI Safe Safar doesn't wait for people to come, **it goes where the risk exists: highways.**

Specially designed outreach trucks travel across India, acting as:

- Moving classrooms
- Awareness platforms
- Symbols of safety and sustainability

These trucks cover thousands of kilometers, bringing safety directly to:

- Truck drivers
- Transporters
- Highway communities

Making Learning Real, Relatable, and Memorable

TCI Safe Safar understands that **information alone doesn't change behaviour, experience does.**

That's why it uses **interactive and culturally relevant formats:** Nukkad Natak (Street Plays)

Real-life stories performed in local languages - Making safety emotional and relatable

On-the-spot Quizzes - Reinforcing learning through participation

Pledge Drives - Turning awareness into commitment

Roadshows & Demonstrations - Engaging drivers in real-world scenarios

These methods ensure that safety is not just heard—but **felt and remembered**.

Beyond Safety: A Holistic Approach

What makes TCI Safe Safar truly impactful is its **holistic vision**.

It goes beyond road safety to address:

- Driver health & hygiene
- Fatigue awareness
- Avoiding alcohol & mobile use while driving
- Environmental responsibility (plastic reduction, EV awareness)

This aligns with a larger goal: Building not just safer drivers – **but healthier, more responsible citizens on the road.**

Sustainability Meets Safety

TCI Safe Safar also integrates ESG (Environmental, Social, Governance) principles:

- Use of CNG and EV-based outreach trucks
- Awareness on reducing carbon footprint
- Promoting sustainable logistics practices

Because the future of road safety is not just safe – it is also sustainable.

Reaching the Next Generation: TCI Safe Safar Junior

“Aaj seekhenge bachche... kal badlenge raaste.”

Recognizing that real change starts early, TCI introduced

TCI Safe Safar Junior

This initiative focuses on school children – the future drivers and citizens of India.

What Makes It Unique:

- Learning through storytelling and fun activities
- Use of popular characters like Chhota Bheem to engage young minds
- Nukkad natak and classroom sessions
- Teaching basics like:
 - ◊ Traffic rules
 - ◊ Helmet use
 - ◊ Safe pedestrian behaviour

Why it matters: Children don't just learn – they influence families, communities, and future behaviour.

A Movement That Connects Everyone

TCI Safe Safar is not limited to drivers – it connects the entire ecosystem:

- Drivers & Cleaners
- Transporters
- Customers & Manufacturers
- Communities near logistics hubs
- School children (future drivers)

It creates a 360-degree safety culture—where everyone becomes a stakeholder.

Impact beyond Roads

The initiative has:

- Won prestigious recognitions like British Safety Council's James Tye Award
- Received FICCI Road Safety Award for innovation
- Been acknowledged as a model for corporate-led road safety transformation

But more importantly, it has achieved something bigger – Changing mindsets.

The Road Ahead

TCI Safe Safar continues to evolve:

- Expanding reach across more regions

- Integrating technology and digital tools
- Promoting sustainable and safe mobility
- Building stronger community engagement

Because road safety is not a one-time effort—it is a **continuous journey**.

“Jab har driver, har bachcha aur har nagrik zimmedari samajh lega... tabhi har safar, sach mein Safe Safar banega

Ab Har Safar, Safe Safar!

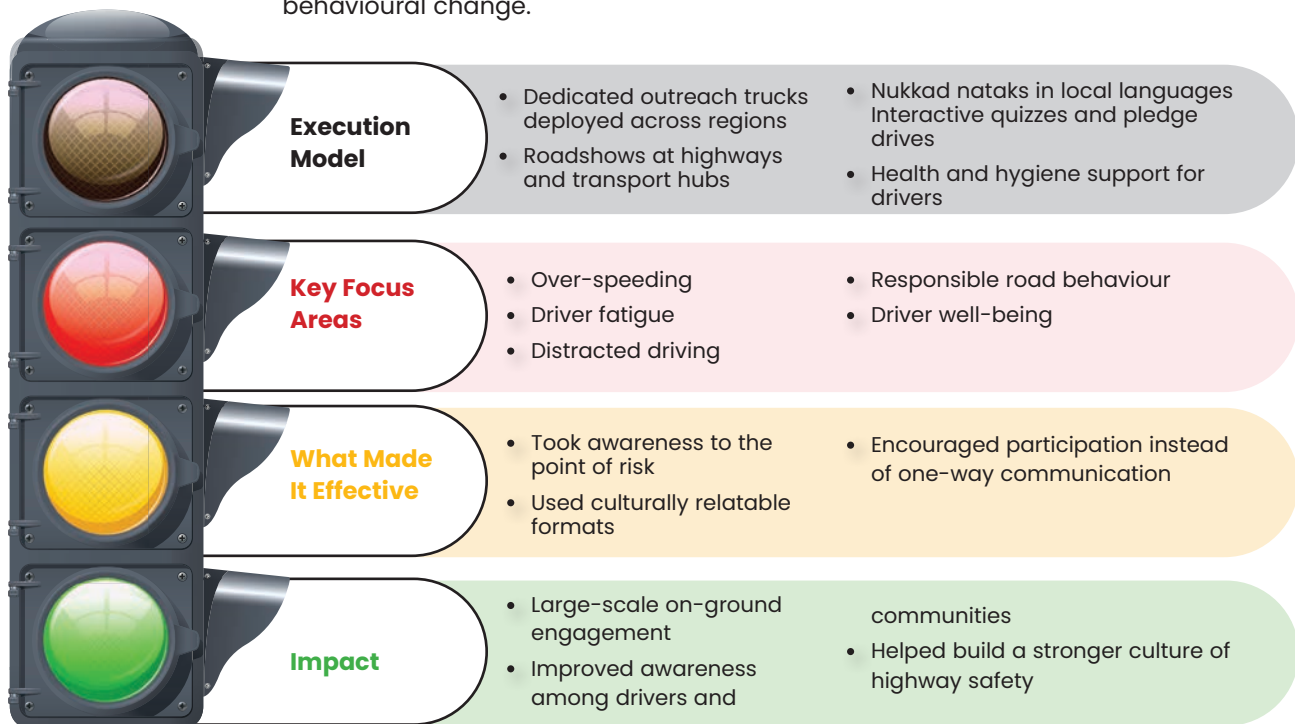

01

Case Study:

TCI Safe Safar – Highway Road Safety Outreach

- Objective:** To take road safety awareness directly to drivers, transport workers and highway communities.
- Challenge:** Traditional road safety campaigns often do not effectively reach people who spend the most time on highways.
- Solution:** TCI launched TCI Safe Safar as an on-ground outreach initiative focused on behavioural change.

Outcome: Demonstrated how a logistics company can move beyond operations and contribute meaningfully to public road safety.

TCI's health and safety programme

02

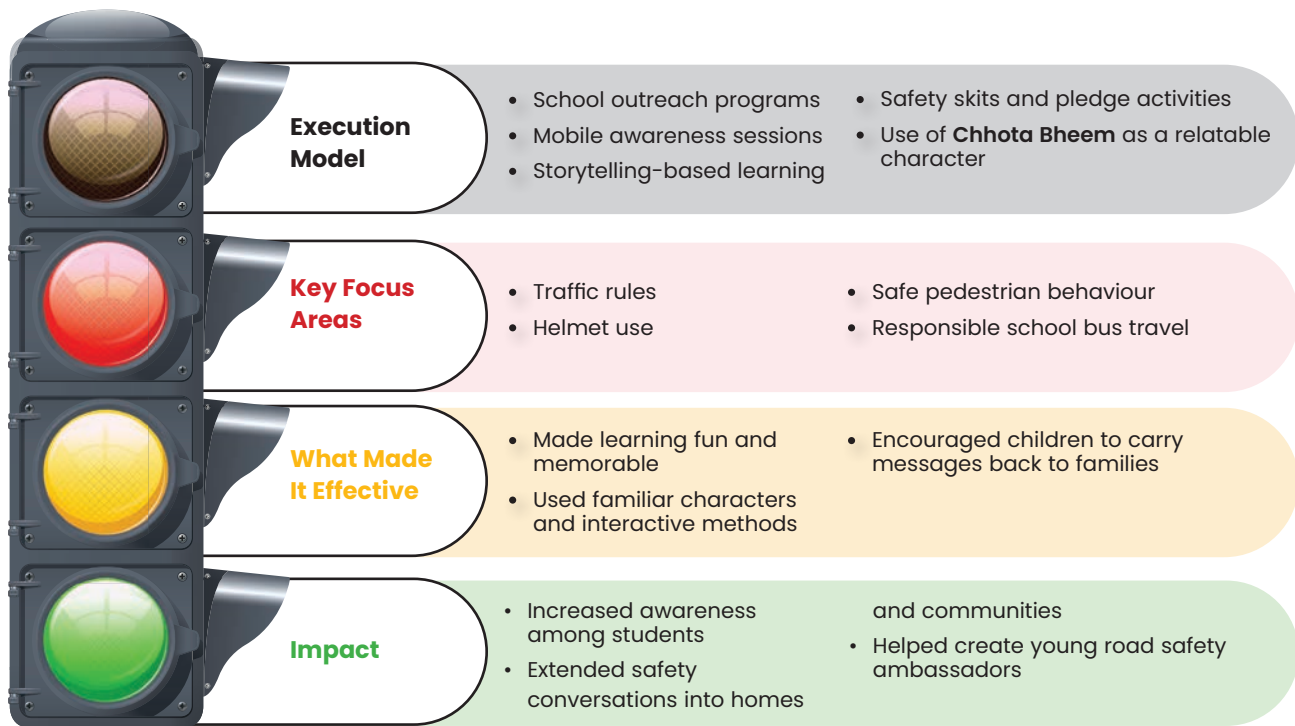

Case Study:

TCI Safe Safar Junior – Road Safety Awareness for Children

Objective: To create road safety awareness among school children and build safer future road users.

Challenge: Children often do not receive engaging and age-appropriate road safety education.

Solution: TCI introduced **TCI Safe Safar Junior** to take road safety learning directly into schools and communities.

Outcome: Showed that lasting road safety change begins with early awareness and education.

CONCLUSION

From Awareness to a Way of Life

“Suraksha ek niyam nahi... ek soch hai. Aur jab soch badalti hai, tabhi desh badalta hai.”

India stands at a defining moment in its journey of growth. As highways expand and logistics networks become stronger, the true measure of progress will not just be speed or scale—but safety. Because every journey that begins on our roads carries something invaluable: human life.

This edition has shown us that road safety is not a distant goal—it is an achievable reality. The experiences of countries like Sweden, Norway, and the Netherlands prove that change is possible when intent meets action, and systems are designed with people at the center.

Closer home, initiatives like TCI Safe Safar demonstrate that transformation does not always begin with policy—it often begins with responsibility. By reaching drivers where they are, engaging communities, and educating the next generation, TCI has shown how awareness can evolve into action, and action into impact.

But the road ahead requires collective commitment.

- **Governments** must strengthen infrastructure and enforcement
- **Industries** must embed safety into operations
- **Communities** must promote responsible behavior
- **Individuals** must choose caution over convenience

Because ultimately, road safety is not someone else's responsibility—it is everyone's.

The vision is simple, yet powerful:

A country where every journey ends safely.

A future where accidents are not accepted but prevented.

A culture where safety is instinctive, not enforced.

“Har safar ki asli jeet, surakshit ghar lautna hai.”

As we move forward, let this not just be a conversation, but a commitment.

Because when safety becomes a shared value, every road becomes safer, and every journey becomes a promise fulfilled.

Ab har safar... sach mein Safe Safar.

TCI's health and safety programme

CORPORATE UPDATES

Achievements & Recognitions

MD Shri Chander Agarwal Ji Honoured at Asia Pacific Entrepreneur Awards '26

Our Managing Director, Shri Chander Agarwal Ji, has been honoured with the Leadership & Visionary Excellence Award under the category of Operations & Supply Chain Leadership Excellence at the Asia Pacific Entrepreneur Awards 2026, held in Singapore. The award recognizes his visionary leadership and strong focus on innovation in the express delivery sector. Under his leadership, TCI EXPRESS continues to set new benchmarks in operational excellence and customer-centric services, further strengthening its footprint across the Asian logistics landscape.

Top 100 Most Consistent Wealth Creators Award

TCI has been recognised among the Top 100 Most Consistent Wealth Creators at the 30th Annual Wealth Creation Study. The award was received by Mr. Manoj Tripathi, CEO – TCI Supply Chain Solutions and Ms. Hansa Sharma, Company Secretary (Head – Secretarial & Compliance). The recognition highlights TCI's strong leadership and commitment to long-term value creation.

Global HR Excellence Award

Mr. Pramod Jain, President & HR Head, received the prestigious Global HR Excellence Award (Individual Category). The award recognized his outstanding leadership and strategic HR excellence. In his absence, the honor was received by Mr. Satyapal Verma at Taj Lands' End. The event was attended by 300+ CXOs and eminent industry leaders.

Best Logistics Partner by Royal Enfield Apparel

We are delighted to be awarded the Best Logistics Partner by Royal Enfield Apparel. This award highlights our expertise in providing seamless, efficient logistics solutions for the apparel sector. It is a testament to our team's hard work in delivering service excellence and building strong, trusted partnerships.

TCI EXPRESS Reaffirms ISO Excellence

TCI EXPRESS continues to lead the industry by upholding the highest global standards. We are proud to reaffirm our certifications in ISO 9001:2015, 14001:2015, and 45001:2018. These reflect our unwavering dedication to quality, environmental responsibility, and workplace safety, ensuring we deliver excellence to our customers while maintaining a sustainable future.

India's Most Preferred Brand 2025–26

TCI EXPRESS has been honoured as the Most Preferred Brand 2025–26 by Marksmen. This recognition reflects the trust and confidence customers place in our services. It also highlights our focus on reliability, innovation, a tech-driven network and consistent service quality across India.

Great place to work recognition award

For the sixth consecutive year, TCI EXPRESS has been officially certified as a Great Place to Work. This milestone belongs to every team member whose commitment, collaboration, and shared purpose drive our legacy forward and make our workplace truly exceptional

Interaction with ET Now on TCI's Airship Logistics Plan Explained

Mr. Vineet Agarwal, MD – TCI In an interaction with ET Now discussed TCI's strategic collaboration with Flying Whales to introduce rigid airships for heavy cargo transportation. He highlighted how this partnership aims to enable the movement of oversized cargo to remote and infrastructure-constrained locations such as mountainous terrains, mining zones, and industrial sites. The initiative is expected to offer a sustainable and efficient logistics solution where traditional connectivity is limited.

Scan this QR code to watch the full video

Interaction with NDTV Profit on TCI Signs Pact with Flying Whales

Mr. Vineet Agarwal, MD – TCI, in an interaction with NDTV Profit, discussed TCI's strategic collaboration with Flying Whales and the future of multimodal logistics. He highlighted how heavy-lift airship technology, capable of transporting 60–80 tonnes in a single move, can transform cargo movement across remote and challenging terrains. He also emphasised that as infrastructure demand grows, innovation, sustainability, and scale will shape the next phase of the logistics industry.

Ab Har Safar, Safe Safar!

Milestone and Impact of TCI Safe Safar

* as on 31st March 2026

TCI Safe Safar is a flagship road safety awareness initiative by Transport Corporation of India Limited, committed to making India's roads safer for all.

2019 - The Beginning

TCI Safe Safar was launched in January 2019 in Gurugram, with the vision: "To Drivers, Through Drivers - making India's Roads Safer!" Inaugurated by Shri Nitin Gadkari Ji this initiative marked the start of a nationwide road safety mission.
